TO WHOM IT MAY CONCERN:

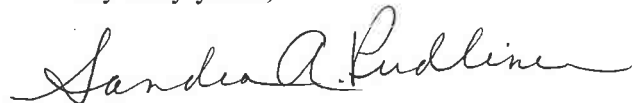

**Re: Keystone Consulting Engineers, Inc.**

Keystone Consulting Engineers, Inc. has provided engineering services for our Township since May 1996.

Their longevity can only be attributed to their superior engineering skills, coupled with their excellent interaction with people, whether they are developers, residents, or staff. The Township has also reaped a significant fringe benefit through the historical knowledge they have acquired on numerous municipal projects. All of this results in significant dollar savings to the Township since Keystone has acquired a full understanding of the municipal environment and is able to deal with all projects in an efficient and cost effective manner.

From the Township's perspective, we are strong proponents of receiving value for monies expended. When you deal with Keystone, you can expect nothing but the best in Civil Engineering. To our Township, Keystone represents the perfect blend of value and service.

Very truly yours,

Sandra A. Pudliner  
Township Manager
