

Hanover Township

Lehigh County, PA

July 26, 2010

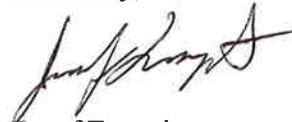

TO WHOM IT MAY CONCERN

Re: Keystone Consulting Engineers, Inc.

Keystone Consulting Engineers, Inc. has been providing Geographical Information System (GIS) services as the Engineer for the Township since 2000.

The Township's GIS system is an extremely in depth and valuable asset, and is constantly being used by Township personal. Some uses include; public water, sanitary sewer, and stormwater system maintenance and capacity modeling; and roadway maintenance and right-of-way determination. Some other uses include Zoning and Development information and notifications. Keystone is continually updating the GIS and has been committed to providing upgrades, support, and training whenever needed by the Township.

Sincerely,

Josef Fragnito
Township Public Works
