

PESKIN

Realty & Construction Company

To whom it may concern:

We have enjoyed working with Keystone Consulting Engineers on several of our commercial site development projects over the past few years. Throughout the course of our experiences with KCE, we have found the firm's personnel to be thoroughly competent with the site design and development plan approval process. We have enjoyed an unparalleled level of customer service from KCE which is evident in their treatment of every project, large or small, as top priority.
